	net	1512,00 €	
* please fill in	incl. freight charge (Germany free shipping), delivery time and freight surcharge EU are shown in the offer		

EcoMagHSM mortar is supplied as raw material container/packaging unit including all necessary components, this means 100 kg raw material incl. special binder/hardener plus 10-18% additional water make approx. 55-60 liters of EcoMagHSM ready-mixed mortar. EcoMagHSM mortar is an unshaped heat-storing product and not a finished or construction product. The mass does not contain dangerous substances subject to classification under the AstVO, therefore EcoMagHSM mortar is in our opinion also not subject to certification according to BauPVO / Bauproduktengesetz or BauPG / Bauregelliste. The terms and conditions of EcoMag GmbH apply. Delivery and invoicing are handled by our EU distributor Lehmann & Voss (LehVoss Group Europe), i.e. their valid general terms of delivery and sales can be found at <https://www.lehvoss.de/de/agb/>. Specific offer and delivery date will be sent as soon as possible after your specific request, e.g. deliveries for industrial needs as truckloads in BigBags and requests for licensing. Our products are exclusively intended for use in professional, commercial or self-employed activities. We therefore only supply companies in industry, commerce, trade and not consumers (pursuant to § 13 BGB). By placing an order, the buyer expressly declares that he is acting in the exercise of its commercial or self-employed professional activity (§ 14 BGB).
